PLAYING A GAME

COIN TOSS/WIND

Before the referee can start the game, the coin must be tossed. The winner must choose to kick or receive, and the loser must choose which goal his team will defend in the first half.

Choose **A** for Heads or **C** for Tails before the coin is tossed.

If you lose the toss, you must choose a goal to defend. Look at the flag to see which direction the wind is blowing. Make sure to note which goal the wind is blowing

toward, and remember that the wind blows with the same force and in the same direction for the entire game. Press **A** or **C** to choose a side to defend.

THE SCOUTING REPORT

From the Game Set-Up screen, press **A** to receive the *Scouting Report*, complete with video footage.

- To view the videos, Press **B** from the Scouting Report menu.

Each player on the roster is rated on a scale from 1 to 15. You can scout any team before the game, but while a game is in progress you can scout only the teams on the field. Press PLAY/PAUSE to pause the game, then select Scouting Report .

RECEIVING THE KICK

If you're receiving the kick, your return man automatically fields the ball and runs it back. You can take control of him as soon as the ball is kicked.

Press the D-Pad in the direction you want the player with the star to move.

To line up in onside formation:

- 1) Press **A** to call an audible
- 2) Press **C** to shift the players

Note: Press **A** then **B** to return to the previous formation.

KICKING

The following kicking instructions apply to kickoffs, punts, and field goals.

1. Press **C** to snap the ball and start the Power Meter moving upward.
2. To aim the kick, D-Pad **LEFT/RIGHT** after you press **C**.
3. Press **C** again to stop the meter and strike the ball. The higher the meter is at the time when you stop it, the farther the ball travels.

ONSIDE KICK

1. Press **A** to call an audible.
2. Press **C** to set the onside kick formation.

(If you change your mind and want to return to the normal kickoff formation, press **A** and then **B**.)

3. Press **C** to put the Power Meter in motion.
4. Press **C** again immediately while pressing the D-Pad **RIGHT**.

Note: When the kicking team is set in onside formation, the kick meter's range is reduced so that the maximum distance the ball can be kicked is 15 yards.

OFFENSIVE COORDINATION

John Madden Football™ allows you the choice to control a play from the moment the ball is snapped until the referees blow it dead, or to simply call a play and watch it unfold. But before you can call a play, you have to select a set and a formation.

- To Select an offensive play:
 - D-Pad **RIGHT/LEFT** to cycle through the player set types, then press **A**, **B** or **C** to select.
 - D-Pad **RIGHT/LEFT** to cycle through the formations, then press **A**, **B** or **C** to select.
 - D-Pad **RIGHT/LEFT** to cycle through the plays, then press **A**, **B** or **C** to select.

(See FORMATIONS, PLAYS and ALIGNMENTS on page 21 for descriptions of each formation and type of play.)

HINT: A fake snap might draw the defense offside. Press **B**.

RUNNING

The handoff on a running play is automatic. You take control after the handoff. The star symbol marks the ball carrier, and his jersey number appears so you know who he is. Use the D-Pad and the action buttons to move the ball carrier through the defense, or watch the 3DO execute the play you just called.

- Dive Press **A**
- Spin (hold) Press **B**
- "Umph" (tap) Press **C**

PASSING

There are three receivers for every passing play, represented by the **A**, **B** and **C** buttons.

After you snap the ball, you can let the computer execute the play, or you can press **C** to bring up the passing windows. Then press the button corresponding to the window of the intended receiver.

Pass to a receiver by pressing the corresponding button.

Hold the button for a bullet pass; tap it for a lob.

HINT: At the line of scrimmage you can send a receiver in motion by pressing the D-Pad **LEFT/RIGHT**.

TAKING CONTROL OF THE QUARTERBACK

If you move the quarterback out of the pocket or off his designed roll-out by pressing the D-Pad in any direction, the 3DO will no longer execute the play. Then it's up to you to press **C** to bring up the passing windows, choose a receiver, and pass the ball.

Once the ball is in the air, the passing windows disappear. The target spot where the ball is headed appears on the field as an orange, circled cross.

Press **B** to switch control to the intended receiver, then use the D-Pad to guide the receiver to the spot if he's not already there. Also, you can press **C** to raise the receiver's hands. This increases the chance of catching the ball.

Also, you can press **C** to raise the receiver's hands and jump. This increases his chances of catching a high pass.

- Dive for the ball: Press **A**
- Reach for the ball: Press **C**

CALLING AN OFFENSIVE AUDIBLE

There are three pre-programmed audibles in every formation for the offense:

- To Execute an audible:
 1. Press **A**. The Audible Indicator appears on the screen.
 2. Press **A**, **B** or **C** to select an audible.
 3. Press **C** to snap the ball. The play begins.

HURRY-UP OFFENSE

When the clock's running down at the end of a half or at the end of a game, most teams don't take the time to huddle. At the end of a play you can go straight to the line of scrimmage, where you can choose the formation and play, but not the players on the field.

- Press **C** right after the whistle.
- Press **A** right after the whistle to run the Stop Clock play.

SUBSTITUTIONS

When you're on offense, you can substitute your quarterback. If your backup signal caller is a better runner than the starting guy, you might want to put in the sub against a team that has given up zero yards passing.

- To replace your quarterback:
 - 1) Press **PLAY/PAUSE** to pause the game, then D-Pad **DOWN** to SUB IN QB.
 - 2) Press **C**. Your quarterback is substituted, and you return to the playcalling screen.

Note: You can substitute your quarterback only between plays when you are on offense.

DEFENSIVE COORDINATION

As with the offense, the 3DO will control the defense if you wish. In fact, you don't even have to call your own formations, sets and plays. If you don't choose a defense, your team runs the Madden-recommended play. (See page 29 for a description of each formation and alignment.)

After calling a defensive play, you can select the man you want to control by pressing **B** until the star appears under that player.

The most important command to know on defense is the **B** button. The **B** button switches your control to the defensive player closest to the ball carrier. Move your defender with the D-Pad.

- Dive at ball carrier: **A**
- Activate the defender closest to the ball: **B**
- Jump and raise hands to block a kick or a pass at the line, or to intercept a pass, or to lay a heavy hit: **C**

- To Restore a playoff: Select *Cont. Playoff* or *Cont. All-Time Playoffs* from the Game Set-Up screen.

FORMATIONS, PLAYS AND ALIGNMENTS

Below is a list of the available formations. Following the formations are the plays and the most common alignments.

SHOTGUN

This is primarily a passing formation because the quarterback receives the snap about five yards behind the line. He gets a deeper drop, which means more time to throw the ball.

RUN & SHOOT

This formation has four quick receivers and a halfback. Guys with good hands who run forty yards in less than five seconds are the stuff defensive backs have nightmares about.

PRO-FORM

This is a version of the pro-set, where a fullback and a halfback line up beside one another and behind the quarterback.

FAR and NEAR

These terms simply describe where the halfback lines up. He's either *far from* or *near to* the strong side of the offensive line. (That's the side where the tight end lines up.)

I FORMATION

Two backs line up directly behind the quarterback. A great formation from which to run dives, sweeps and screens.

SINGLE BACK

Two tight ends and one halfback make this a good rushing formation.

GOAL LINE

Two backs directly behind the quarterback and everyone else tight on the line make this a fine formation for short yardage situations.

OFFENSIVE PLAYS

FLOOD

One of the most effective ways for a quarterback to beat zone coverage is to flood, or overload the zone with multiple receivers. A defender has to think twice about leaving his own zone to follow a receiver into another guy's zone.

CUT

You've heard of turning on a dime. That's sportswriter talk. I never really understood why you'd want to do that, even if it was possible. I guess it means turning fast. I think cutting is a more accurate description of the ability to change direction. A guy's going one way and boom, he cuts and is going another way.

PULL

In a pull play the guard runs parallel to the line of scrimmage and turns up field when he clears the tight end. The running back follows right behind, a smile on his face.

TRAP

Like all good offensive plays, the Trap depends on deception to work. The idea is you "trap" a defensive guy into thinking one thing is happening, when really something totally different is going on. For example, you let a defensive end just walk into the backfield. You put up only token resistance. He's saying "Man, this is a piece of cake, I'm going to stuff this play and maybe get a sack." Suddenly an earth mover disguised as an offensive guard comes from an unexpected direction and the defensive guy is on his backside wondering what happened. The runner jets through the area where the defensive guy was, when he was standing up.

COUNTER

A Counter play relies on misdirection. You try to sell the defense on the idea that the play is going right, for example, when in fact you want to go left. It's a tough sell. You send everybody but the water boy and the guy who's going to carry the ball in one direction. When you have them moving the "wrong" way, give the ball to the running back and he runs to daylight in the opposite direction.

SCREEN

A screen is a short pass caught behind the line of scrimmage. Usually the quarterback lures rushing defenders toward him and then loops a soft pass over their outstretched hands to a moving running back/receiver who follows a screen of blockers downfield.

PLAYACTION

Playaction (also called play fake) refers to a pass thrown after the quarterback has faked a handoff to a running back. The back tries to add to the deception by pretending to take the ball and follow blockers. The idea is that the fake delays the pass rushers, and makes the defensive backs run toward the line to help tackle the guy they think has the ball.

DRAW

The opposite of a playaction pass. The QB drops back as if to pass and hands off to the running back who charges up the middle of the formation. By the time the rushing defenders realize the deception, their momentum may have taken them beyond the ball carrier.

QUICKOUTS

Sometimes called a square out. In this pass pattern the receiver takes a few steps upfield and makes a quick 90 degree cut to the nearest sideline. If he doesn't want to sit next to the water cooler for the rest of the game, he tries to stay in bounds.

CROSS

Most crossing patterns are the opposite of quickouts—the receiver turns toward the middle of the field. Some guys call them slants, but it just depends on the angle that the receiver runs.

POST UP

Post patterns are for fast guys. The receiver runs downfield and angles in toward the goal post. If the quarterback can really air out the ball, and the receiver can run like the wind, this bomb can score.

OFFENSIVE ALIGNMENTS

The formations show how your offensive team lines up when you call certain plays (see OFFENSE, above). Remember: Not all plays are compatible with every formation. We're showing you the most common ones here. You'll be more competitive if you use these alignments in combination with the PLAYER RATINGS found in the Scouting Report. Here's an example of how they work.

From the Scouting Report you can find out who your fastest wide receiver is. You might want to call a play for him from the passing windows, if his hands are as good as his feet.

DEFENSIVE FORMATIONS

GOAL LINE

A good line up for stuffing the short run and goal line defense.

3-4

Featuring three down linemen with four linebackers, this defense is now the most popular in professional football. Used for short and medium zone pass coverage and containment against the run.

4-3

Standard four down linemen (two tackles and two ends) with three linebackers. It's most effective against short passes and the run.

NICKEL

Gets its name from the addition of a fifth defensive back (nickel back). When a pass is expected, many teams add a defensive back to their sets, and take out a linebacker. Cover and Read sets are available.

DIME

When the defense is willing to mortgage the farm that the next play is going to be a pass, they might put in a sixth defensive back. This is the Dime defense or Dime package. Cover and Read sets are available.

DEFENSIVE ALIGNMENTS

The alignments show how your defensive team lines up when you call certain formations. You'll be more competitive if you use these alignments in combination with the Scouting Report. Here's an example of how to use them.

From the Scouting Report you can find out who your fastest defensive back is. Check out where that guy lines up. (Look for his number). If he's not covering the man or zone you want him to cover, get control of him by pressing **B** (until he's standing on the star symbol) and then use the D-Pad to move him into the position where you think he'll be most effective.
